DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Kothandaraman et al. (USP 6,147,520). Figure 2 of Kothandaraman et al. shows an impedance circuit for providing an equivalent impedance between a first node and second node (219, 221) comprising a first impedance (204, 205), a first switch element (211, 212, 213, 214), a second impedance (208, 209), a second switch element (215-218), wherein the equivalent impedance is determined by the first impedance value and the second impedance value through controlling the turn on time and the turn off time of the first switch element and the second switch element (column 2, lines 54-67, column 3, lines 1-45) as called for in claims 1-2 and 5-11.

Regarding claim 3, the control circuit (not shown) for generating control signals 221 and 223, the first control signal 221 turns on and off the first switch element (211-214), the second control signal 223 turns on and off the second switch element (215-218).

Regarding claim 4, the equivalent impedance is determined by controlling the duty cycle of the first control signal and the second control signal (column 2, lines 54-67, column 3, lines 1-45).

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
